CENTER FOR EDUCATION OF COMPLEX DENTAL ISSUES

Demystifying Complex Care Series

A System Based Care Approach to Treating Biofunctional Disorders & Dento-Medical Issues

Complex dental issues and chronic facial pain are often the combined result of underlying biomechanical issues, including: craniofacial dental orthognathics, dentally deleterious medical conditions and environmental issues. The focus of this course is to provide attendees with:

- An understanding of the interrelationship of such conditions and their contribution to symptoms of chronic facial pain, TMJD, migraines, and biomechanical collapse and erosion of natural dentition.
- Evaluation, diagnosis, care planning, and effective predictable treatment systems.
- Business practice management and patient management tools to attract new patients and immediately implement biofunctional disorder philosophies, which enhance patient treatment and practice profitability.

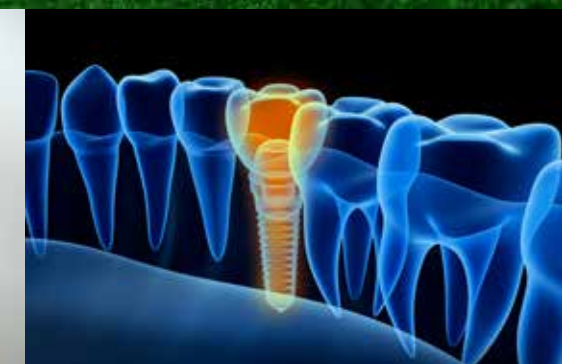

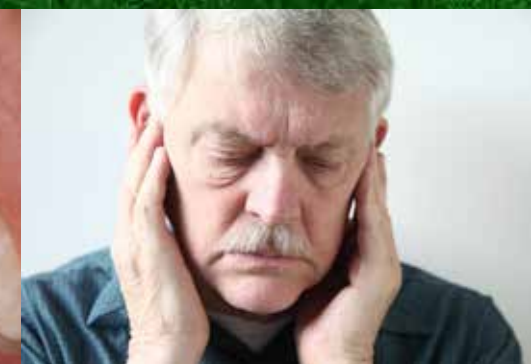

A Biofunctional Approach to Implant Placement and Restoration

- Understanding Implant Technology and Considerations in Selecting an Implant System
- Establish Principles of Implant Site Preparation
- Marketing Concepts for Building an Implant Clientele
- Establishing Practice and Patient Management Implant Protocols and Systems
- Diagnostic and Surgical Data Gathering Considerations
- Medical History Evaluation and Surgical Risk Factors
- Management of Pre/Post-Surgical Inflammation, Swelling, Bleeding and Complications
- Pain Control Protocols
- Principles and Risks of Implant Integration and Bone Formation
- Tissue & Bone Management, Flap Design and Suturing Techniques
- Principles of Treatment Planning, Case Presentation, and Financial Arrangements
