

Advanced Prosthetics Institute
CENTER FOR EDUCATION OF COMPLEX DENTAL ISSUES

DEMYSTIFYING COMPLEX CARE: HELPING DENTISTS ELEVATE SKILL SETS AND PRACTICES TO THE NEXT LEVEL

Restorative Course

A system based care approach to treating biofunctional disorders & dento-medical issues (18 CEs)

- ▶ Course is designed for dentists who are new to implants or with a novice to intermediate level of experience in placing implants. Participants should desire to learn site preparation and tissue management procedures to place implants and increase their opportunities for implant placement.
- ▶ Learn secrets to curing TMJD, chronic facial pain and headaches like an expert!
- ▶ Let API partner with you in developing a "Biofunctional" practice philosophy & team identity.

Surgical Course

A biofunctional approach to implant placement and restoration (28 CEs)

- ▶ Course designed for novice and intermediate implant surgeons interested in placing and increasing implant placement opportunities through site preparation and tissue management procedures.
- ▶ Learn from API's comprehensive approach to treatment planning, complication management, implant placement and restoration from an advanced restorative prospective.
- ▶ Advance your surgical acumen and clinical skill in implant placement in prepared sites, as well as in sites requiring preparation.
- ▶ Let API partner with you in developing a "Biofunctional Implant" practice philosophy & team identity.

"Implants are the end result of surgery. Surgery is not the end result of implants."

- Dr. Jason Campbell, DDS.

Advanced Prosthetics Institute
 CENTER FOR EDUCATION OF COMPLEX DENTAL ISSUES

For nearly 15 years, Jason C. Campbell, D.D.S. has owned a FFS general dental practice. To better serve the many patients coming to the practice with unresolved complex care issues, he completed surgical CE courses at the USC School of Prosthodontics, Periodontics & Oral Surgery programs. This education allowed him to perfect his skills in diagnosing and treating patients suffering with dental demise, terminal dentition, TMJD, chronic facial pain and headaches.

Dr. Campbell's knowledge of biomechanical issues, oral and systemic acidity and related inflammation, combined with his own personal dento-medical issues and patient care experience, lead him to found the **Advanced Prosthetics Institute - Center for the Education of Complex Dental Issues**. He is passionate about helping other dentists incorporate API's "Biofunction" philosophy into their everyday practice so they can become a hero to their patients while catapulting their practice growth. Through API's Demystifying Complex Care course series dentists learn about the principles of restorative care and surgery, including dental implants, from a "Biofunction" perspective. API course graduates also learn to develop their own unique practice identity through API's Biofunction practice philosophy and marketing systems to grow their practice production and profitability.
